

▲ ▲ ▲ VISUAL STYLE GUIDE

asys

A graphic language for composable agentic
systems — Italian modernism, ca. 1970.

01 PRINCIPI — THE IDEA

Flow is the subject

Where dcomp draws what is connected, asys draws what happens next — a run of steps, forks, and joins. The picture is an order of work, never a wiring diagram.

The step is the mark

An equilateral triangle resting on its base, set on a rail. Every graphic derives from steps in sequence. Never a checkmark, a clock, or a person.

Read like type

The rail carries order the way a line carries words: left to right, top to bottom. No arrowheads anywhere. The one inverted triangle is a gateway, balanced where the rail forks.

Flat, always

No gradients, no shadows, no bevels, no glow. Pure fills as if screen-printed in four passes.

02 COLORE — THE FOUR-PASS PALETTE

Verde **LEAD**

#3E7C5A

Structure. The mark, the largest step, the key phrase, and the one active path.

Blu

#2A5CAA

Counterweight. The program worker; the largest scattered form after verde.

Rosso

#D8402E

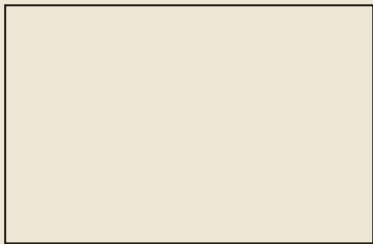

Accent. The human worker — the step a run waits on.

Giallo

#EFB02C

Control. The gateway in diagrams; the brightener in decorative fields. Never for text.

Carta

#EFE7D6

Ground. Warm stock, never pure white. Campo, ink at 7 %, is the environment field.

Inchiostro

#201A12

Type, rules, start ticks, and the channel strip.

Colour names the kind of work, never its state. Verde is the agent, blu the program, rosso the human, giallo the gateway. A hue never encodes done, running, or failed. Decorative fields — tappe, cresta — rotate all four in fixed order: verde, blu, rosso, giallo.

Rails stay ink. Rails, forks, and joins are inchiostro at 45 %. Verde line work is reserved for the single path a composition is about. On ink the paper becomes the type colour and all four hues hold unchanged.

WORDMARK
150 / 700

asys

CLAIM
31 / 500

Agentic systems, composed.

SECTION HEAD
15 / 700 / .2EM

NORME GRAFICHE

BODY
13.5 / 400 / 1.5

A workflow defines tasks, prompts, commands, questions, and control flow. A worker environment provides the programs and tools that execute them. The same BPMN can run in different environments.

SPEC / FEET
11-12 / 700 / .2EM

V0.1.0 · MIT · LINUX · DCOMP 0.3 · PYTHON 3.10+

DESCRIPTOR
13 / MONO

```
asys-workflow run WORKFLOW ENVIRONMENT
agent      /opt/asys/asys-workers/tools/asys-agent
program    /opt/asys/asys-workers/tools/asys-program
human      /opt/asys/asys-workers/tools/asys-human
```

REGOLE

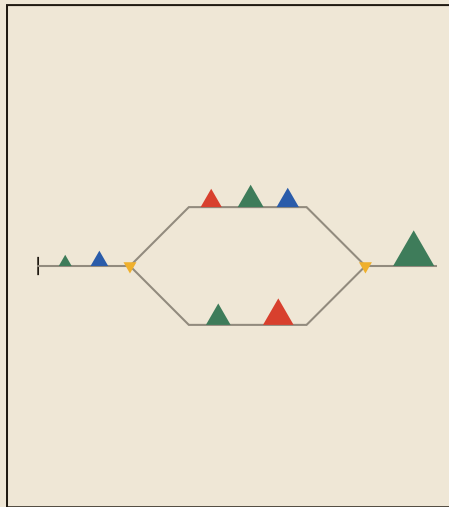

Wordmark is always lowercase. Never capitalise, never letterspace it.

Display type gets negative tracking (−0.06em at wordmark size). Small caps type gets positive (0.16–0.24em).

Two weights only: 700 and 500/400. No italics, no light weights, no condensed cuts.

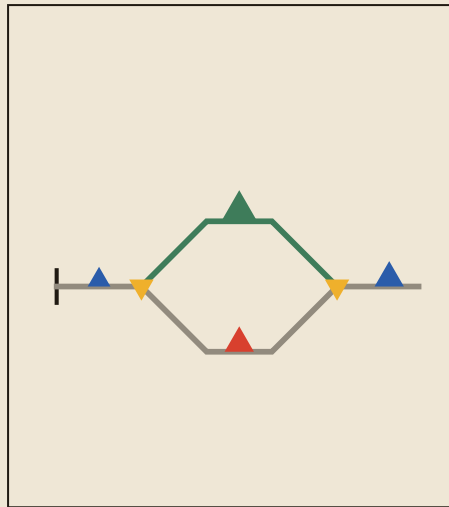

Weight and size carry hierarchy — never colour alone.

One monospace is permitted, and only for job types, commands, paths, and BPMN identifiers. It is never used for prose, headings, or the wordmark.

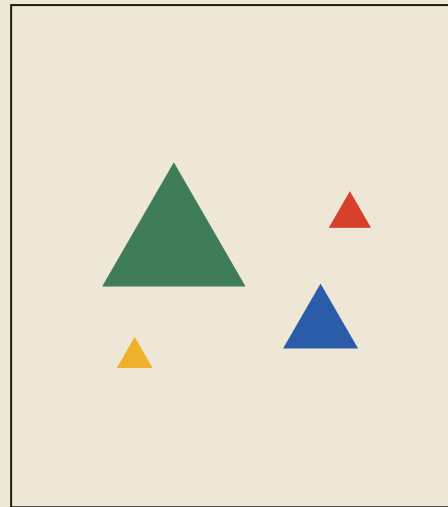

A • Il percorso

The run. Steps on a rail that forks and rejoins, scale growing along the way, hues by worker. Starts at a tick, may leave the page. The hero element — one per composition.

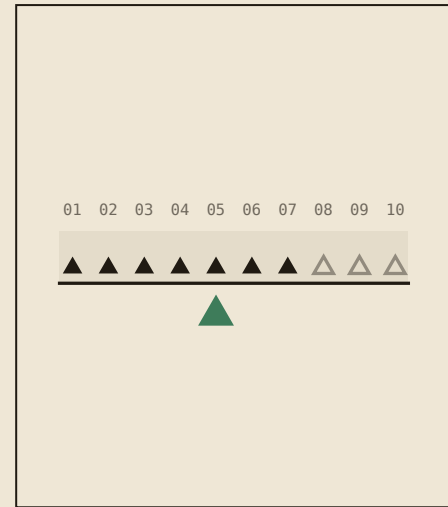

B • Il bivio

The fork. The rail splits at 45° and rejoins; a giallo gateway balances on each. Verde line work marks the one branch the picture is about.

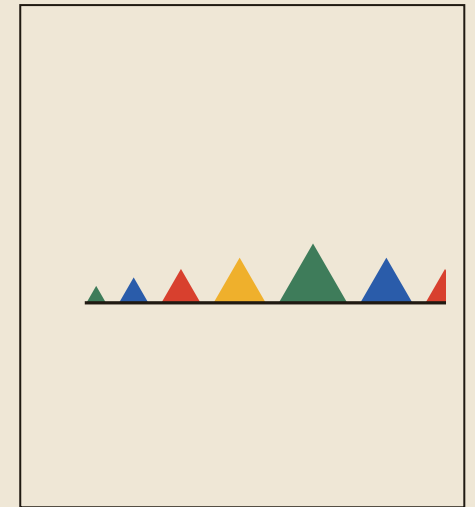

C • Le tappe

The steps. Flat triangles at descending scale, scattered off-grid into empty paper. Four maximum. Always resting on the base, never rotated.

D • Il nastro

The channel. A numbered strip of events in sequence; open ones are not yet published. The cursor is a verde step reading from below.

E • La cresta

The ridge. A frieze that swells then falls on a shared baseline — divider or footer band, never decoration alone.

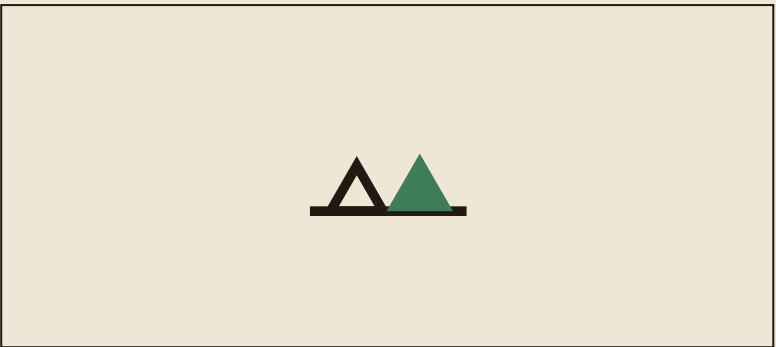

05 MARCHIO — LOCKUPS

A · PRIMARIO

B · NEGATIVO

C · SIMBOLO (FAVICON, AVATAR)

Clear space equals the filled step's base width on all four sides. **Minimum size** 24px for the symbol, 96px wide for the horizontal lockup. The two steps never swap fill — the open one is the task, on the left; the filled one is the worker that runs it. Never box the lockup, never set it on a percorso.

06 IMPAGINAZIONE — COMPOSITION

Diagonal tension: spec line top-left, run mass upper-right, wordmark block lower-left, feet along the base. Margin 4 % of canvas width.

One run per composition

A single percorso. Two competing runs read as two systems.

Let the run leave the page

A rail may bleed off the right edge — the workflow is longer than the page. It never bleeds left; it starts at a tick. Type never bleeds.

The environment is a field

An environment is a flat band of campo the rail crosses, never a box. Dashed enclosures belong to dcomp; keep them out of an asys picture.

Empty paper is structure

At least a third of the field stays bare. Do not fill it with steps or copy.

▲ SÌ

Flat fills, warm paper, four rotating hues led by verde.

Triangles resting on their base, set on a rail, as the whole vocabulary.

Big tight lowercase Helvetica against small letterspaced caps.

Asymmetric balance with a third of the field left bare.

Runs bleeding off the right edge of the canvas.

Monospace for job types, commands, and BPMN identifiers only.

▲ NO

Gradients, drop shadows, glows, glassmorphism.

Arrowheads, chevrons, play buttons — a triangle never points the way.

BPMN notation drawn literally: diamonds, envelopes, gears, swimlanes.

Pure white grounds or pure black type.

Robots, brains, clipboards, checkmarks, hourglasses, emoji.

Green-for-done, red-for-failed status colouring.

Centred symmetrical layouts, or rounded “card” containers.

A fifth colour, a second display typeface, or any italic.
